Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1 and 4-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over EBI (4,333,086) in view of TAYLOR et al. (6,019,455), for reasons as of record.

Response to Arguments

4. Applicant's arguments filed 16 September 2004 have been fully considered but they are not persuasive.

In response to Applicant's request to withdrawn the finality of the last Office action, the finality has been withdrawn.

In response to Applicant's argument none of the references disclose or suggest using an extraction force comprising dielectrophoresis to form fluid packets and then extract the fluid packet, the examiner finds this is to be unpersuasive. EBI discloses the use of an external force to form a fluid packet and then extract the fluid packet to be ejected onto a surface for printing (Figs. 3, 6 and 7) as asserted by the examiner in the last Office action. TAYLOR shows the use of an external force applied to an ejection electrode **134** to cause ink particles together with a small quantity of a carrier liquid adhering to the particles to be ejected onto a surface **136** for printing (col. 7, lines 2-7) where the force is of a mechanism such as an electrophoresis mechanism or a dielectrophoresis mechanism (Figs. 1, 2, 21 and 22). Further, TAYLOR discloses that the ejected particles are in the form of a droplet (col. 9, lines 22-23). As such, from the combination of references' teachings, the selection of any of known equivalent external forces to form the fluid packet and extract the fluid packet onto a surface for printing would have been within the level of ordinary skill in the art as asserted by the examiner in the last Office action.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
